March 25, 2025

### **Received the 2024 “Green Flag” Award from the Port Authority of Long Beach, U.S.A., in the Vessel Speed Reduction Program**

Following last year, Eastern Car Liner, Ltd. has received an award from the Port Authority of Long Beach as a vessel operator with a high implementation rate of slower navigation within the Port of Long Beach coastal area in the year 2024.

The port has implemented the Green Flag Program to reduce greenhouse gas (GHG) emissions, including carbon dioxide (CO<sub>2</sub>) and nitrogen oxides (NO<sub>x</sub>), by limiting the speed of vessels to 12 knots or less within 40 nautical miles of the same port, with the aim of protecting the environment.

The Port Authority recognizes vessel operators who have achieved a high implementation rate with the program every year. In 2024, our vessels were recognized for achieving a high compliance rate for port calls to Long Beach.

In the spirit of our environmental vision, we remain committed to striving for harmony between our business operations and activities to preserve the global and marine environment, thereby contributing to the progress toward a sustainable society.
